Nagar, Ajmer (Rajasthan)

## SKILLS

- Creativity
- Quick Learner
- Problem Solving
- Teamwork Skills
- Leadership skills.
- Decision Making

## TECHNICAL SKILLS

- Languages: PHP, JavaScript
- Backend: Node.js, Express.js, Laravel, CodeIgniter 4, REST APIs
- Frontend: React.js, Next.js, HTML, CSS
- Databases: MySQL, MongoDB
- Caching/Real-time: Redis, WebSockets, Firebase Cloud Messaging
- Authentication & Security: Token Authentication, OAuth/Social Login, OTP, AES-256
- Tools: Git, AJAX, jQuery

## PROFILE

Backend-focused Software Developer with 5+ years of experience building production web applications, REST APIs, authentication systems, real-time features, and database-driven services. Hands-on experience with Node.js, Express.js, PHP, Laravel, CodeIgniter 4, MySQL, MongoDB, Redis, WebSockets, React.js, and Next.js. Experienced in token-based authentication, OAuth/social login, OTP, access control, API integrations, and building reliable backend systems for web and mobile applications.

## WORK EXPERIENCE

**Working as an Sr. Backend Developer, from 06 Oct. 2025 - Present at Pixel Softwares, Panchkula, Haryana.**

- Designed and maintained production REST APIs using CodeIgniter 4, implementing token-based authentication, OTP verification, Google/Apple social login, request validation, and secure API flows.
- Built a real-time step-tracking and streak-reward system with Redis caching and cross-device sync logic.
- Integrated Firebase Cloud Messaging for push notifications and WebSocket-based real-time events (chat, community updates, live status).
- Developed a transaction-based wallet and incentive system with balance tracking, reward calculations, and transaction processing while maintaining data consistency across user accounts.
- Built a full community and group chat system with AES-256 field-level message encryption, media sharing, reactions, and read receipts.
- Worked across the stack with React.js and Next.js for web-facing features alongside the CodeIgniter backend.

**Working as an Senior Software Developer, from 12 Aug. 2024 - 31 May. 2025 at Wave Infotech, Panchkula, Haryana.**

- Designed and developed web applications using Laravel, React.js, and MySQL/MongoDB, ensuring clean architecture and scalable codebase.
- Integrated complex frontend/backend interactions using AJAX, RESTful APIs, and jQuery, improving performance and user experience.

- Managed deployments using Git, handled production bug fixes, and ensured zero downtime during updates.
- Mentored junior developers, reviewed code for best practices, and maintained consistent coding standards across the team.

**Working as an Team Leader, from 22 Aug. 2022 - 31 July. 2024 at Windin Solutions Pvt. Ltd., Ajmer**

- Responsible for managing a team of developers, assigning tasks, setting goals, and ensuring the successful delivery of software and web-based projects.
- Oversaw project timelines, monitored progress, and took corrective actions to keep deliverables on track.
- Maintained documentation, identified team training needs, and conducted performance evaluations to drive improvement.
- Collaborated with clients and internal stakeholders to align technical execution with business requirements.
- Actively contributed to development tasks, handling both team-led and individual projects when required.
- Conducted code reviews and enforced coding standards across the team, reducing production bugs and improving overall code maintainability.
- Facilitated sprint planning and daily stand-ups, improving team velocity and on-time delivery across multiple concurrent client projects.
- Onboarded and mentored new developers, accelerating their ramp-up time and integration into ongoing projects.

**Working as an Assoc. Software Developer, from 1 Sept. 2021 - 20 Aug. 2022 at Windin Solutions Pvt. Ltd., Ajmer.**

- Developed and maintained web-based software applications, following industry best practices and coding standards.
- Implemented new features, resolved bugs, and enhanced existing modules to improve functionality and performance.
- Participated in training sessions and self-learning to stay updated with the latest tools, languages, and technologies.
- Contributed to code optimization and addressed technical debt in existing projects.
- Diagnosed and troubleshooted software issues efficiently, providing effective technical solutions.

## PROJECTS

---

### Multi-Vendor E-Commerce Platform (Web & App-Based) - MERN Stack

- Developed a multi-vendor e-commerce website with full-featured admin and vendor panels.
- Vendors can self-register, manage profiles, and add/edit products under categories and subcategories.
- Customers and vendors have access to dedicated mobile apps to manage their orders and profiles.
- Implemented OTP-based registration and login system for secure authentication (similar to Amazon).
- Admin panel supports user management, order tracking, category management, and platform analytics.
- Tech Stack:
  - Frontend : React.js (Web), React Native (Mobile)
  - Backend : Node.js, Express.js
  - Database : MongoDB
  - Authentication : OTP via SMS API

---

### Nu Young MLM Software (Web Based)

- Developed a Two-Leg Binary MLM system with left and right team structures.
- Enabled users to earn through multiple income streams such as Referral Income, Matching Income, Bonus Income, and Rank Income.
- Integrated cryptocurrency payment system allowing automatic deduction and credit to user crypto wallets.
- Designed a real-time commission calculation engine to accurately compute referral, matching, bonus, and rank income across multiple network tiers.
- Built automated wallet transaction logic with audit trails to ensure accurate, tamper-proof crypto deposit and withdrawal processing.
- Implemented role-based access control for admins, ensuring secure and controlled management of user accounts, payouts, and support tickets.
- Tech Stack:
  - Front End : Laravel, HTML, CSS, jQuery
  - Back End : MySQL

## Laundry Management Software (Web-Based)

- Developed an ERP system and mobile application for a UK-based laundry service business supporting multi-vendor access.
- The system allows vendors to manage orders, customers, and service operations efficiently.
- Tech Stack:
  - Front End: Laravel, HTML, CSS, JavaScript
  - Back End: MySQL

---

## Data Management Software - Kishangarh Beawar NH-8 Tollway Pvt. Ltd. (Web-Based)

- Built for a highway construction company to manage work orders and data related to current, past, and future projects.
- Features included report generation, bill creation, and data management modules tailored to infrastructure workflows.
- Tech Stack:
  - Front End: Laravel, HTML, CSS, JavaScript
  - Back End: MySQL

---

## Job Portal Software & Website - Seabridge Employment Agency (Web-Based)

- Developed a multi-vendor platform supporting Job Seekers, Recruiters, and Training Institutes with separate panels for each.
- Features included job applications, resume sharing, training course purchases, chat system, notifications, and dynamic CV generator.
- Integrated payment gateway, email alerts, and premium memberships for all user types.
- Tech Stack:
  - Front End: Laravel, HTML, CSS, JavaScript
  - Back End: MySQL

## EDUCATION

---

### Master of Computer Application

Vivekananda Global University, Jaipur  
Pursuing

---

### Bachelor of Computer Application

Maharshi Dayanand Saraswati University, Ajmer  
2018 - 2021

---

### 12th

Board of Secondary Education Rajasthan, Ajmer  
2017 - 2018

---

### 10th

Board of Secondary Education Rajasthan, Ajmer  
2015 - 2016
